

SENATOR VENDITTE: No, I can give you that answer right now, Senator Simon. I think relocating the sewage treatment plant on South 10th Street, I believe the cost is right around \$3 million for each mile of sewer lines that would have to be installed. Okay? I believe that came from Senator Swigart yesterday.

SENATOR SIMON: I don't know how many miles there are, but I'll get you afterwards. I need the information. The other question I wanted to ask you, is you mentioned, I believe, a figure of \$50 million coming from the federal government. Was that the figure that you mentioned?

SENATOR VENDITTE: Yes.

SENATOR SIMON: Is that, in fact, money that is definitely coming in, or is that a guesstimate, or what is that figure?

SENATOR VENDITTE: No, that is factual information, Senator Simon. I think if you would have looked at the information that was handed out yesterday I think it is pretty well documented as to the exact amount of money that is coming in and that has come in.

SENATOR SIMON: Fifty million dollars is coming in over the next....

SENATOR VENDITTE: Five years, that is for sure.

SENATOR SIMON: Over the next five years.

SENATOR VENDITTE: We just received some \$7.3, I believe, million February 3rd from the federal office of the EPA.

SENATOR SIMON: Do you know if the city had.... What is the city planning on doing with that money?

SENATOR VENDITTE: Their plans were simply to correct the necessary repairs there at the sewage treatment plant and providing basin lids to cover each of the treating plants there.

SENATOR SIMON: Okay, thank you.

PRESIDENT: Senator Venditte, I have an awful lot of lights on. There is a matter on Select File that we must get taken care of today, and there are some extensive announcements. We'll take this up first, on General File, then because there is no way we can finish at this point.

SENATOR VENDITTE: Okay, Mr. President. Thank you.

CLERK: Mr. President, I have some reports.

PRESIDENT: Wait. We'll cease on this bill now.

CLERK: I have some reports to read in.

PRESIDENT: Alright, read them in.
